

PHASE 0 — Sabse pehle prototype ka exact objective fix karo

Prototype mein poora India solve nahi karna hai.

Hum ek vertical slice banayenge:

| Intelligent Validation |

| Confidence + Risk Score |

| Human Review ? |

YES

| Verification UI |

| Verified Record |

| Audit + GIS View |

Bas ye flow flawlessly chal gaya = strong internal prototype.

🚀 Prototype ka naam bhi abhi se define karo

Temporary project name:

BhoomiVerify AI

Intelligent Land Record Digitization & Validation Engine

Naam final nahi hai; PRD stage mein branding separately karenge.

🔧 Prototype ko 10 modules mein todte hain

Main recommend karunga:

Module	Prototype mein?	Priority
Document Upload	✓	P0
Document Quality Analysis	✓	P0
OCR / Handwriting Extraction	✓	P0
Intelligent Field Extraction	✓	P0
Structured Record Generation	✓	P0
Validation Engine	🔥	P0
Confidence/Risk Engine	🔥	P0
Human Verification	🔥	P0
Audit Trail	✓	P1
GIS/Map View	🔥	P1
Dashboard	✓	P1
API	⚠️ Mock/basic	P2
Multi-language	2–3 languages demo	P1
Full LRMS integration	✗ mock	P2

Module	Prototype mein?	Priority
Full DILRMP integration	✗ mock	P2
Production security	✗ prototype-level	P2
AI self-learning	Demo feedback loop	P2
