

PHASE 8 — Confidence + Risk Engine

PS confidence scoring explicitly require karta hai.

Lekin main ise sirf extraction confidence nahi rakhunga.

Do scores:

1. Extraction Confidence

AI kitna sure hai ki usne document sahi padha.

2. Record Reliability / Risk Score

Multiple sources kitne consistent hain.

Example:

EXTRACTION CONFIDENCE

92%

RECORD CONSISTENCY

64%

RISK

HIGH

Ye distinction bahut innovative hai.

Because:

AI document ko correctly read kar sakta hai, but document itself outdated ho sakta hai.

Example

AI:

Owner = Ram Singh

OCR confidence = 99%

But database:

Owner = Suresh Singh

Then:

OCR confidence = 99% ✓

Record reliability = LOW ⚠

This is exactly the kind of intelligence we want.
